

Professional Statement Online

(Project Management + Cybersecurity + Data Center / Compliance Focus)

I am Gerry W. Stevens, an analytical and solutions-focused professional with a background in aviation and commercial electronics, transitioning into cybersecurity with a strong emphasis on security operations, regulatory compliance, and risk management. I bring a foundation in applied science, systems thinking, and technical problem-solving, combined with hands-on training in cybersecurity and project management.

I am particularly focused on supporting secure environments through threat awareness, vulnerability management, and adherence to compliance frameworks and industry standards. My experience and interests extend into project coordination and execution, including the planning and support of data center infrastructure deployments, where security, efficiency, and operational continuity are critical.

With a disciplined approach to learning and execution, I am committed to protecting digital assets, strengthening organizational security posture, and contributing to cross-functional teams through structured project delivery and continuous improvement.
